Letter of Recommendation – RE Fit Out Motorola Russia Head Office May 2009

Dear Sirs,

Following a tender for Project Management and Quantity Surveyor services, Sunbury Heights were chosen for their full service package, experience, and competitive pricing. The new office project was completed in two parts, the design and fit out of new head offices for Motorola in Moscow City, and then a further fit out of additional space, in all approximately 2000 sq metres.

The service provided by the Sunbury Heights Project Management team ensured that Motorola moved in on time, and through careful budget control, the project completed on budget. Sunbury Heights maintained leadership and control of all aspects of the project, including quality control, engineering and technical reviews, continuous communication with all parties, as well as problem solving and mitigation.

We appreciate the hard work and dedication of the Sunbury Heights project team as led by David Breese, and his team Nadezhda Bokai-Poltavets, and Olga Somova, and Igor Nazarenko. Due to hands on approach, organisation and professionalism of the team, the project was a success, problems that arose dealt with in a timely manner, and Motorola stakeholders happy with the conclusion and outcome.

Motorola recognise the performance, attention to detail, and overall quality of service provided by Sunbury Heights, and would be happy to recommend Sunbury Heights to any future potential employer.

Your Faithfully
